

ROTARY DISTRICT 7450

Rotaplast International Committee

Since 1999, Rotaplast International has been the District's official committee for providers of reconstructive surgery of cleft lip and cleft palate for children. Their goal is to fund and participate in medical missions to underdeveloped countries where children cannot be helped otherwise. The District 7450 Rotaplast Committee was founded by District Governor Daniel Bronson and has conducted nearly twenty missions to third world nations every year since then.

Its outreach serves over twenty-six nations in Asia, Africa, South and Central America and Eastern Europe. The medical missions are requested by Rotary clubs in nations where free medical help is not available from the government or private organizations. Rotarians are the primary funding organization of Rotaplast. The Rotaplast family is comprised of over 400 Rotarian volunteers, 20 board members and 6 paid staff. It is recognized by Charity Navigator as a 4-star Charity; it's highest rating.

Rotary volunteers are encouraged to participate in a mission. The medical teams include up to 19 medical volunteers and 10 Rotarians. No prior experience is required. Rotaplast provides training for volunteers to become mission directors, quartermasters, medical records keepers, sterilizers, photojournalists, interpreters, and other roles needed to assist in all aspects of a mission.
